

**ABSTRACT OF THE DISCLOSURE**

5           A management apparatus for allowing a parent to limit  
the amount of time a specific user is allowed access to an  
electronic device. The management apparatus includes an enclosure  
that has an interior space. A controller for processing a plurality  
of electronic operations is positioned in the interior space. An  
10 alphanumeric display displays information and is attached to the  
front side of the enclosure. A keypad for inputting numerical data  
is attached to the front side of the enclosure. A modem positioned  
in the interior space of the enclosure. A phone jack is attached to  
the second side of the enclosure. A power cord is attached to the  
15 second side of the enclosure. A plurality of receptacles allows  
coupling of electrical cords from electrical devices. A cover  
member covers the first end of the enclosure and is releasably  
attachable to the first end by a plurality of fasteners.
